

# Assets outline

Here are the specific prompts to generate the visual assets. These are optimized for tools like **Midjourney (v6)** or **DALL-E 3**.

They are designed to replicate the "Andalusian Romance" style found in your source image: warm architectural watercolors isolated on white backgrounds so you can easily remove the white and make them "float" on your website.

## 1. The Hero/Footer Skyline (The Masterpiece)

---

This creates a wide, panoramic version of the illustration at the bottom of the invitation to use as a footer or hero anchor.

**!!** Prompt:

A panoramic architectural watercolor illustration of the Seville, Spain skyline. Featuring the Giralda tower, the Cathedral, and the Torre del Oro. In the foreground, the Triana Bridge over the Guadalquivir river. Soft, warm lighting reminiscent of a late summer afternoon. Palette of warm creams, terracotta oranges, antique bronze, and soft sage greens. Traditional wedding invitation style. High detail, hand-painted aesthetic. Isolated on a pure solid white background. No text. --ar 3:1 --stylize 250

## 2. Spot Illustrations (Floating Decor)

---

Use these to break up text sections (e.g., placing a branch in the corner of the "Our Story" section).

### Option A: The Seville Orange (Iconic to the region)

**!!** Prompt:

A watercolor illustration of a single branch from a Seville orange tree. Featuring lush sage green leaves, white orange blossoms, and one ripe terracotta-colored orange.

Delicate, elegant, and romantic. Vintage botanical illustration style. Isolated on a pure solid white background. --ar 1:1

### Option B: The Olive Branch (Subtle separator)

**!!** Prompt:

A gentle watercolor painting of a Spanish olive branch with silver-green leaves and small olives. Minimalist and elegant. Soft brush strokes. Isolated on a pure solid white background. --ar 3:2

### Option C: Andalusian Tile / Azulejo (For corners or patterns)

**!!** Prompt:

A single, intricate Spanish ceramic tile (Azulejo) design. Traditional geometric Moorish pattern. Painted in watercolor style using antique blue, bronze, and burnt orange. Aged, vintage look with slight texture. Isolated on a pure solid white background. --ar 1:1

## 3. Functional Icons (Navigation & Guest Info)

---

For the "Guest Info" page, replace standard vector icons with these watercolor spot illustrations.

### For Flights/Travel:

**!!** Prompt:

A tiny, minimalist watercolor illustration of a vintage airplane in silhouette. Painted in antique bronze and charcoal tones. simple and elegant. Isolated on a pure solid white background. --ar 1:1

### For Hotels/Accommodation:

**!!** Prompt:

A tiny, minimalist watercolor illustration of an antique skeleton key. Painted in antique bronze tones. Simple and elegant. Isolated on a pure solid white background. --ar 1:1

#### For RSVP/Toast:

**!!** Prompt:

A tiny, minimalist watercolor illustration of two champagne flutes clinking. Painted in soft gold and warm grey. Simple and elegant. Isolated on a pure solid white background. --ar 1:1

## 4. Background Texture (The Canvas)

---

To give the website the feeling of the paper used in the PDF.

**!!** Prompt:

High resolution texture of antique cream-colored cotton paper. Subtle grain, slight warmth, very faint uneven texture to mimic expensive wedding stationery. No distinct patterns, just soft paper noise. Even lighting. --ar 16:9

### Technical Tip for "Floating" Effects

---

AI generators (like DALL-E or Midjourney) usually generate images on a **solid white** background, not a transparent one. To achieve the "floating" effect for your website:

1. Generate the image using the prompts above.
2. Use a background removal tool (like Photoshop, Remove.bg, or Canva) to delete the white background.
3. Save the file as a **PNG with Transparency**.
4. **CSS Implementation:** When placing them on the site, use a subtle drop shadow to lift them off the page:

## CSS

```
.watercolor-asset {  
  filter: drop-shadow(0px 4px 6px rgba(156, 124, 88, 0.15)); /* Bronze  
shadow */  
}
```
